

A modern, bright interior space featuring a wide-plank wood-look laminate floor. The room has large glass windows and doors leading to a garden. A staircase with a glass railing is on the left, and a long console table with a vase of dried flowers is on the right. The ceiling is white with recessed lighting.

Inspired by Nature. Enhanced by Technology.

Inspired by the natural beauty of authentic timber, Tribute uses advanced Digital Print Technology to recreate an extraordinary variety of grain patterns, tonal variation and natural features. The result is a floor with remarkable depth, character and realism, capturing the look and feel of timber through the precision of modern technology.

Combined with a newly developed Highly Water-Resistant core, Tribute is engineered to withstand the demands of everyday living. AC4-rated for heavy residential and commercial applications, with a 4-sided bevel edge and matte embossed surface that enhances the authentic timber look and feel, Tribute delivers exceptional durability, strength and stability without compromising on style.

Nature perfected the original. Tribute pays homage to it. By combining the character and variation found in natural timber with advanced flooring technology, Tribute creates a beautifully realistic floor designed for the way we live today. A modern interpretation of a timeless material, where proven design meets a new generation of performance.

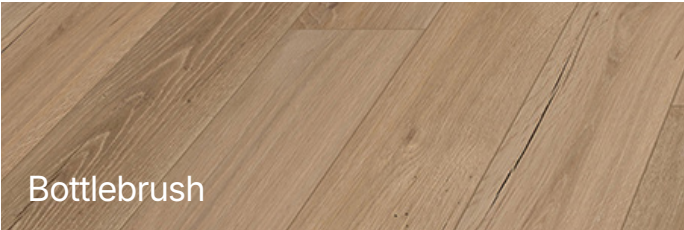

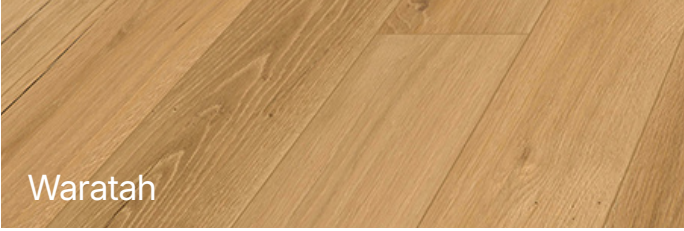

Authentic inspiration. Modern innovation.
