ENGINEERED TIMBER · EUROPEAN OAK HERRINGBONE · 6 COLOURS

Adore Collection

From the Forest to your Floor

ORIGINMARK™
traces our timber back to responsibly
and sustainably managed forests.

A beautiful floor shouldn't come with unanswered questions.

TRUEFEATURE EU™
champions authentic European Oak,
with real grain, real knots
and real character.

COLOURGRAIN RT™
develops extraordinary depth and tone
through advanced reactive colour
technology, working with the natural
character of the timber.

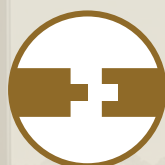

LIVINSAFE A+™
sets an exceptional benchmark for low
emissions and indoor air quality,
because you should know what
you're living on.

Herringbone Floors You'll Adore

Crafted from verified Authentic European Oak, responsibly sourced from sustainably managed forests across Europe, Adore combines the timeless elegance of Herringbone with the natural character and beauty of European Oak.

Our exclusive ColourGrain RT™ Technology works with the oak's natural tannins to create colour that lives within the timber, not just on the surface, revealing exceptional depth, warmth and a beautifully natural appearance. This integral colouring delivers enduring beauty and consistency over time.

Each board is finished with six coats of UV-hardened, water-based coating for exceptional durability and a safer indoor environment.

Beautiful colour, expressive natural grain and authentic timber character come together in the timeless geometry of Herringbone. Designed to transform a room and elevate the way it feels, Adore creates a floor that captures attention, invites admiration and leaves a lasting impression, a floor you'll love living with, and one everyone who enters your home will adore.

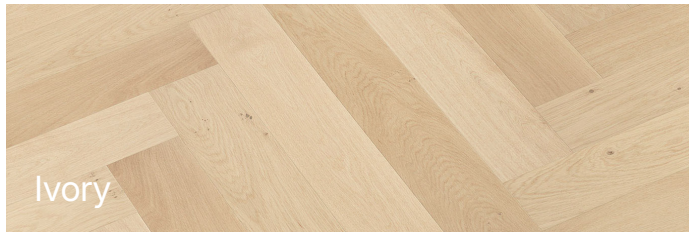

A floor you'll love. A floor they'll adore.
